SCHEDULE B

STATISTICAL CLASSIFICATION OF DOMESTIC COMMODITIES EXPORTED FROM THE UNITED STATES AND REGULATIONS GOVERNING STATISTICAL RETURNS OF EXPORTS OF DOMESTIC COMMODITIES

DEPARTMENT OF COMMERCE,
OFFICE OF THE SECRETARY,
Washington, November 14, 1924.

To collectors of customs and others concerned:

Beginning with the first day of January, 1925, the annexed schedule will govern in the classification of commodities the growth, produce, or manufacture of the United States exported to foreign countries.

1. *Articles shipped abroad temporarily, such as automobiles for touring purposes, commercial samples, racing drivers, films, circuses, and race horses for exhibition, which are to be returned to the United States and are not intended for sale, should not be returned as exports when shipped out nor as imports when brought back.* (Art. 1128, Customs Regs.)

Commodities which, on arriving at a port of the United States from foreign countries, are shown by the manifest, bill of lading, invoice, or any other evidence presented to be destined to a foreign country and are entered for shipment in transit through or for transhipments in the ports of the United States will not be included in the statistics of exports from the United States but will be returned in a special in-transit report. (Arts. 1157, 1165, Customs Regs.)

2. The kinds, quantities, and values of articles of domestic origin exported to foreign countries shall be compiled from the export manifest filed by the shipper to the collector of customs at the port of exportation, prepared on the official form—Customs Form No. 7525—in accordance with the instructions of T. D. 38410. (Arts. 1133, 1158, 1160, and 1161, Customs Regs.)

3. Collectors of customs will require that the details regarding kinds and quantities of exported articles called for by this schedule be shown in the shipper's export manifest. If on examination any declarations are found to be inaccurate or incomplete, either in the description of articles, or in omitting to state proper quantities and values, or insertion of the intermediate country instead of the country of final destination, or containing any error apparent on the face of the declaration, the correction is required before the declaration is accepted. (Art. 1141, Customs Regs.)

4. *Separation of domestic from foreign merchandise.*—The value of articles grown, produced, or manufactured in the United States should be stated in the column "United States products," including foreign goods exported which have been changed from the condition in which imported by refining, grinding, or other process of manufacture. Only foreign goods which have undergone no change in form or condition by the application of labor in the United States should be included in the column of "Foreign products." (Art. 1134, Customs Regs.)

5. *Value of exports.*—The values stated should be the actual cost or selling price, if the goods are sold. If shipped on consignment without a sale having been made, the market value at the time of exportation in the ports of the United States from which exported should be stated.

Freight and other charges from the port of departure in the United States to the place of arrival in the foreign country or noncontiguous territory to which shipped must not be included in the value. (Art. 1135, Customs Regs.)

Values should be stated in whole dollars only, ignoring fractions of less than 50 cents and counting 50 cents and upward as \$1. (Art. 1138, Customs Regs.)

6. *Description of articles.*—The merchandise must be described in specific and not in general terms. Such designations as "fruits," "provisions," "groceries," "canned goods," "hardware," "machinery," or any other general term must not be used, but the articles should be described in sufficient detail to permit of their

classification under the proper classes of this schedule. On the other hand, the description in the declaration should not be in the detail of the invoice enumerating the various kinds and *grades of similar articles*, which would necessitate a laborious condensation into *commodity classification*, but should be a recapitulation of the articles contained in the shipment, with total quantity and value of each kind of article.

The kinds of packages, boxes, barrels, bales, etc., must be specified, with quantities in the unit stated in this schedule, in net weight where required, exclusive of the weight of barrels, boxes, or other bulky coverings and of salt or pickle in the case of salted or pickled fish and meats.

In stating quantities, fractions of less than one-half will be ignored and fractions of one-half or over stated as whole numbers. (Arts. 1138, 1140, Customs Regs.)

7. *Shippers' export declarations confidential.*—Shippers' declarations in the possession of railway and transportation companies and collectors must be treated as confidential, and their contents must not be disclosed to outside parties. (Arts. 1131, 1323, Customs Regs.)

8. *Baggage.*—No shippers' export declarations are required for personal effects carried as baggage. (Art. 1175, Customs Regs.)

9. *Parcel-post exports.*—Postal export declarations on Form No. S250 are required for exports by parcel post valued at \$25 and over, shipped by business concerns in the United States to business concerns outside continental United States.

10. *Country of destination of exports.*—If the country of ultimate destination of the commodities is different from that for which the vessel or car clears or departs, collectors will require exporters and shippers or their agents to state in the shippers' declarations as the country of ultimate destination the country to which the commodities are sold or destined for a market.

Special care should be taken to state the final destination of goods shipped through Canada to Europe and of goods to be transshipped in the United Kingdom, the Netherlands, Germany, and France to other countries.

11. The export declarations are to be transmitted by collectors of customs to the Section of Customs Statistics at New York in the form and manner prescribed in the regulations and instructions issued by the Treasury Department.

Collectors are invited, when the proper class under which a given article should be returned is in doubt, to submit such cases to the Section of Customs Statistics at New York or the Bureau of Foreign and Domestic Commerce of this department for decision.

HERBERT HOOVER,
Secretary of Commerce.
